

# FINANZ MINING

How to earn more and reduce risk  
by exploiting transaction data

Transaction Data Meetup

Frankfurt, February 15<sup>th</sup>, 2024

# Today's banking

**1** advisor

**600** retail customers

**300** SMEs

## Banks poke around in the fog

### Generic customer understanding

Next best offers, Schufa score, some customer segmentation

### Maverick sales

Driven by products instead of (hidden) demand

### No up-to-date customer profile

Customer not tracked permanently

---

Available data is endless, as is the buried potential

**1 bn**

bank accounts  
in Europe

**300 bn €**

revenue potential

# What to do with this customer? (Spoiler: He will leave)

## What the bank knows

- 17 years old
- Has a free account
- Uses bank card
- No personal contact with bank advisor

## What the bank could know

- Will start studying in Munich in fall, 6 months from now
- Is already looking for an apartment there actively
- Recently opened an account with a direct bank
- Will be lost to current bank with 97% probability
- Retention measures help but need to start instantly

# Would you grant a credit to this woman?

## What the bank knows

- 25 years old
- Lives in Berlin-Moabit (doubtful neighborhood)
- Checking account, bank card
- No employment information
- No personal contact with bank advisor
- Earlier contract breaches with telephone companies, but no credit default so far

## What the bank could know

- She has influencer business
- Receives ~€20k quarterly from media companies
- Owning two apartments in Berlin, total value ~€650k
- Rental income ~€2k monthly
- Has a Porsche Boxster and a BMW X5 (the latter leased)
- ETF savings plan of €2.5k monthly at Scalable Capital

---

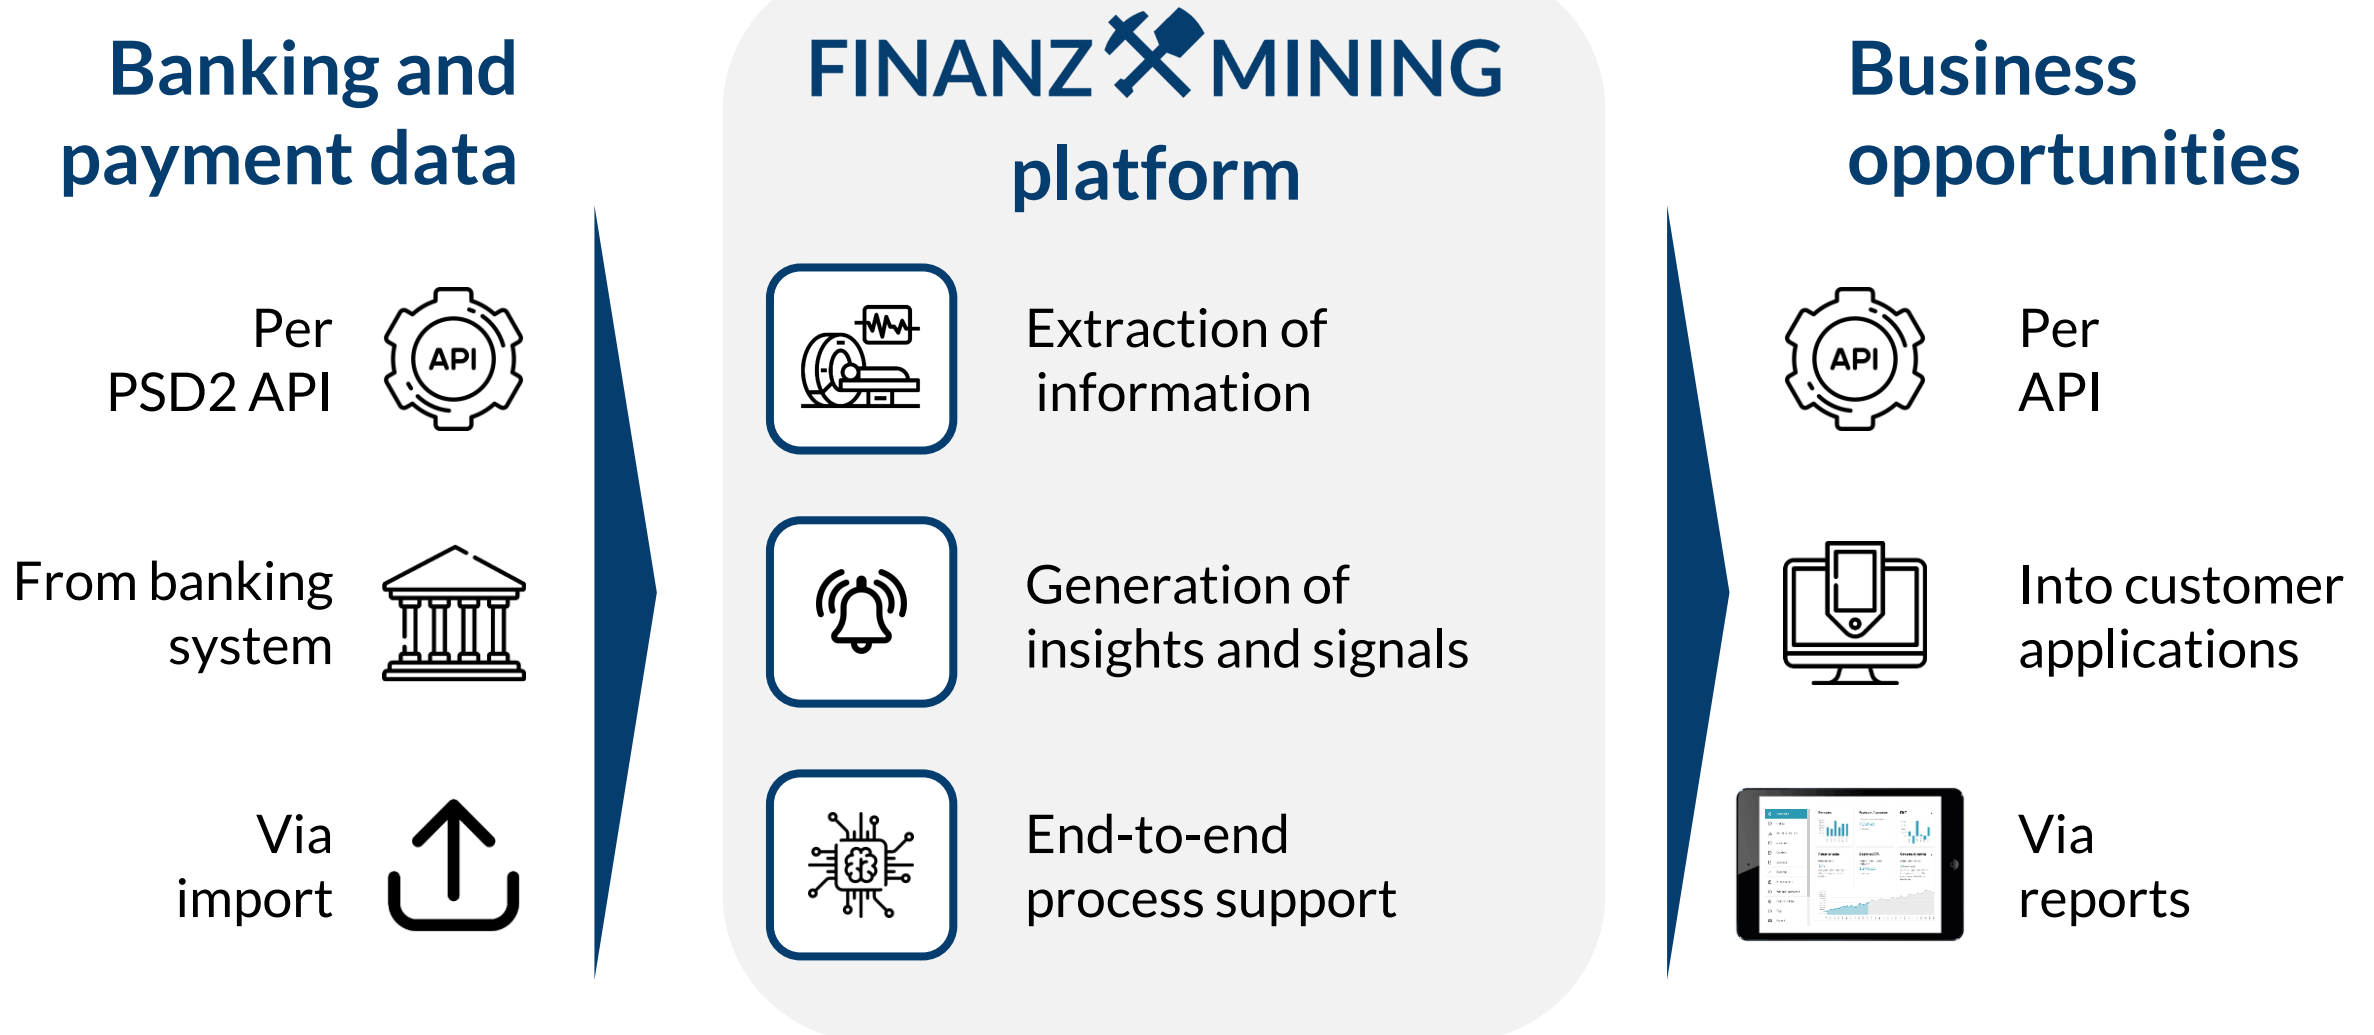

We monetize banking & payment data

FINANZ  MINING

We create  
**instant business  
opportunities and signals**  
relying on  
**in-depth customer x-rays**  
based solely on  
customers' banking & payment data

# Finanzmining engine: From raw data to monetization

# Finanzmining engine: Process steps of the engine

## Banking data

- Use of PSD2 data
- Or direct use of banking or payment system data
- Cloud engine or on-premise setup for banks

## Detailed x-ray

- Detailed transaction semantics retrieval
- Millions of categories to categorize a transaction
- Income types & sources
- Recurring interactions and purchasing schemes
- Contracts & obligations
- Hobbies and interests
- Other consumer habits

## 360° insights

- Current life situation
- Includes household details, job situation, and social environment
- Historic, current and forecasted life events
- Detailed household P&L and household dynamics
- Financial wellbeing analysis and forecast

## Sales & risk signals

- Need of and interest in financial and non-financial products
- Affinities to brands and merchants, and specific purchase triggers
- Detailed risk analytics with 100 categories along affordability, behavior, household stability, and scenario robustness

# Our use cases: Typical areas and examples

## Cross- & up-selling

- Product coverage check and demand
- Tailored financial advisory and sales
- Affiliate product sales
- Product pricing optimization

## Customer value added

- Liquidity & finance management tools
- Digital business companion (for SMEs)
- Customer certificates, e.g. tenant check and other services

## Risk detection

- Instant credit application check
- Credit engagement monitoring
- Customer termination forecast, especially for Gen-Z customers

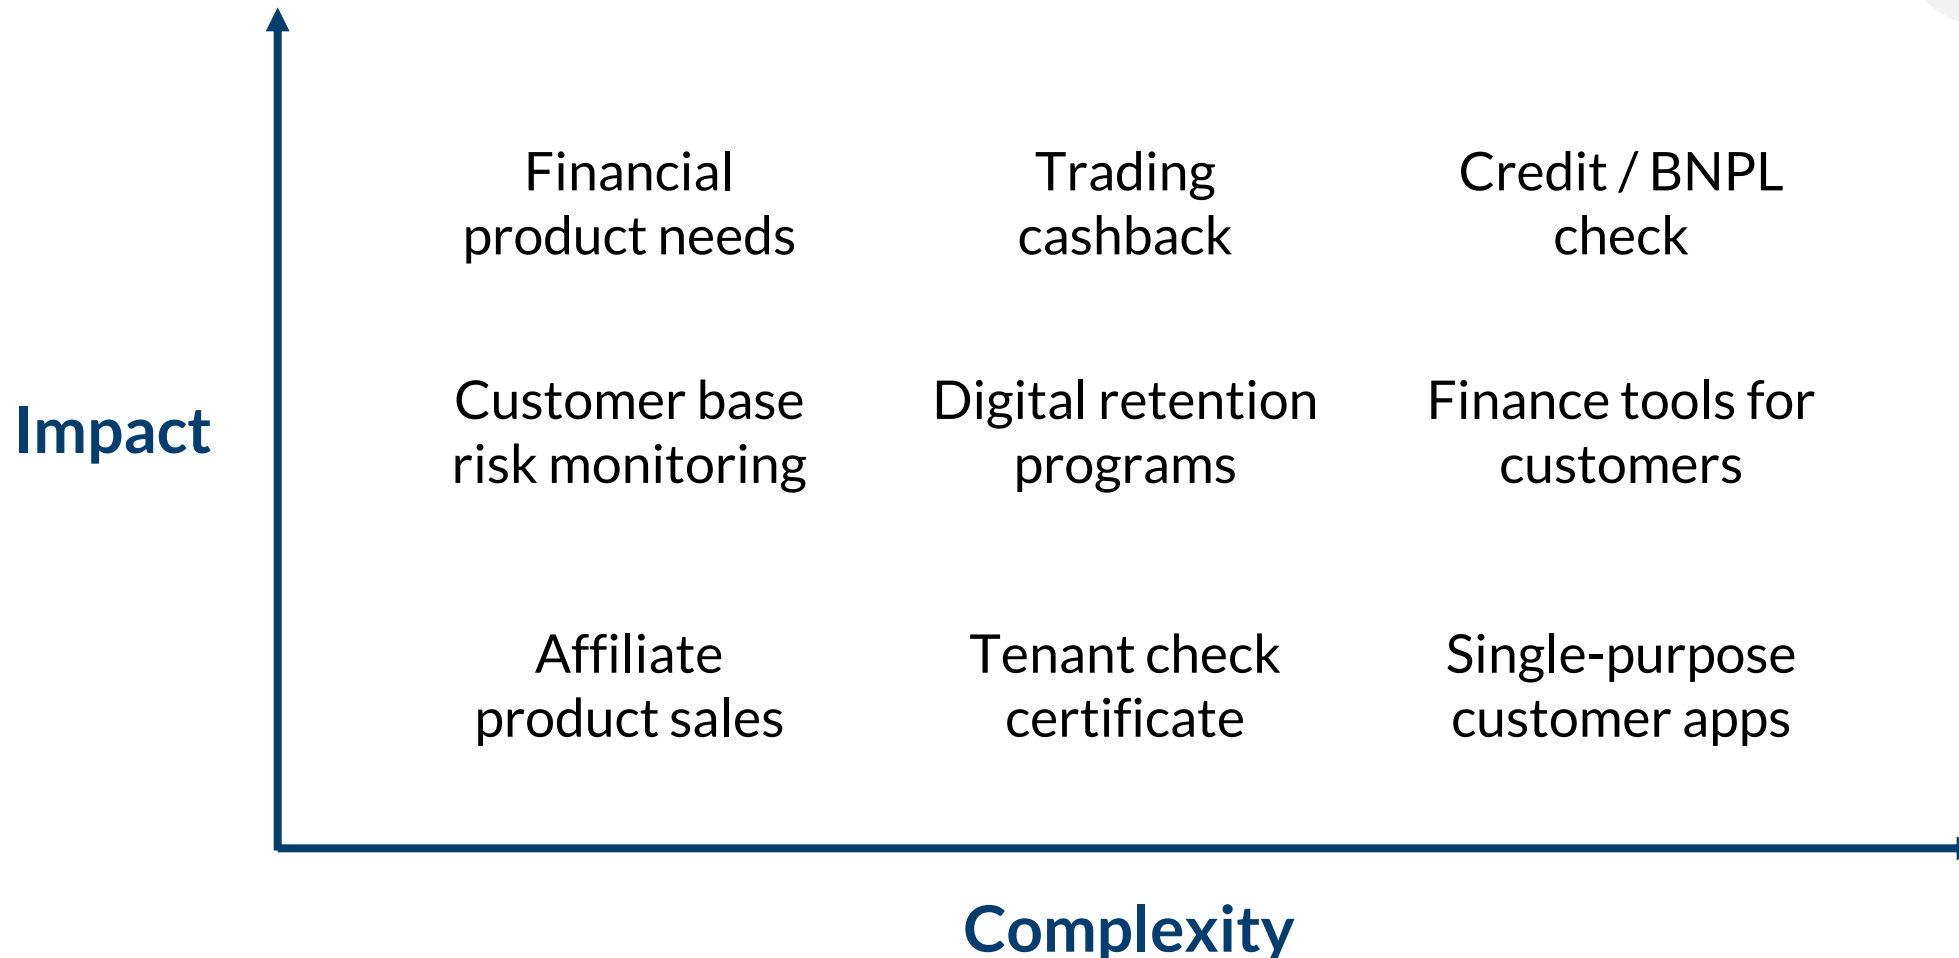

## Customer retention

- Tailored digital cashback programs
- Zero fees on financial product use
- Advisory based on forecasted life and/or business situations

## Our use cases: Complexity (for a bank) vs. impact

Simplified

# The elephant in the room – especially in Germany

- User consent
- GDPR
- Other legal/compliance issues
- Fear for reputation
- Poor examples in market

**Fear of debunking the myths**

## Getting the consent: Four dimensions

### Awesome stuff

### User demand

Credit application

User certificates,  
e.g. tenant check

Cashback schemes

### Describe clearly

Single-purpose  
apps & tools

Finance  
applications

### Reward user

€ 5–10

For each use case, we advise how to get consent and to optimize conversion

---

## Contact us for advice and solutions

- monetization potential of your users
- quick-win use cases
- getting and optimizing consent
- using our engine to the max
- getting live rapidly with minimum setup
